The Final Piece Of The Aesthetic Puzzle

The Encode Complete restorative system eliminates the need for implant level impression with Robocast Technology; there is no need to disturb soft tissue by removing and replacing healing abutments and using traditional impression copings.

- 🦷 Robocast Technology Eliminates Implant-Level Impressions, Working Above the Gingiva Preserves Soft Tissue
- 🦷 Custom Milled CAD/CAM Abutments Are Patient Specific, Anatomically Designed according to laboratory and clinical specifications
- 🦷 Custom milled CAD/CAM abutments are fabricated with ideal marginal abutment height & form closely following the sulcular profile to optimally support the peri-implant soft tissue.
- 🦷 Contour, taper and emergence profile are designed with consideration to surrounding gingival architecture and dental structures, with the ability to correct variations in implant angle, depth and rotation to meet the needs of the individual case.

Molina/Watson Dental Technologies Inc. is a leading implant restorative laboratory.

We've established close associations with Biomet 3i allowing us the most up to date information on products, trends, and techniques.

Molina/Watson maintains vigorous continuing education schedules to stay on the cutting edge of current implant innovations.

Our extensive knowledge and experience allow us to provide your patient with the finest implant restorations available.

We use the latest technology, CAD/CAM, to provide lab designed, case specific custom abutments.

Encode Complete \$599.00

We Provide:

- 🦷 Model Fabrication & Patient Specific Custom Titanium CAD/CAM Abutment
- 🦷 Gold Tite Screw
- 🦷 Porcelain Bonded To Noble Alloy Crown

Available Abutments

- 🦷 Gold Nitride Coated CAD/CAM Abutment \$649.00 Complete
- 🦷 Zirconia CAD/CAM Abutment \$699.00 Complete

Also Available:

- 🦷 All ceramic crown add \$25.00
- 🦷 Zirconia Crown add \$50.00
